Total Other Liabilities	5,250,530	5,425,919

(1) Includes among others BOD and Auditor costs, marketing and communication, Energy and Utilities, Travel Expenses, Consultants, Bank Charges and Guarantee fees, Associative contribution

(2) Includes toll road Energy/Utilities, Insurance and other direct related costs

The main changes are recorded in the "Fee and other costs" line item, which mainly consists of the Concession Fee, calculated as 2.4% of net toll revenues, and in the "G&A Costs" line item.

(iii) Level of Tariffs

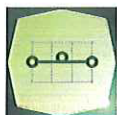

Below are the rates per vehicle class, net of VAT and ANAS surcharge, applied since 1 January 2021:

Toll Class	Tariff (€/Km) since 1 January 2021
Light Cl. A	0.15799
Heavy Cl. B	0.18957
Heavy Cl. 3	0.22312
Heavy Cl. 4	0.36386
Heavy Cl. 5	0.43919

In the Relevant Period, no tariff changes have occurred and the Issuer has not requested any adjustment in tariffs.

However, with Resolution no. 16/2019 of 18 February 2019, the Transport Regulation Authority ("ART") initiated a consultation procedure aimed at defining a toll tariff system based on the *price-cap* method with determination of the productivity indicator X at five years.

Following such consultation procedure, the ART adopted specific resolutions for each concessionaire that is in the process of updating its Financial and Economic Plan, such as the Issuer. As a result, the ART issued Resolution no. 87/2021 ("**Resolution 87/2021**") with respect to the Issuer. In particular, Resolution 87/2021 sets out a new system in which the toll tariff comprises: (i) a "management tariff", intended to assure the

recovery of operating costs and capital costs (amortization and remuneration) of non-reversible assets, and (ii) a “construction tariff”, aimed at allowing the recovery of capital costs (depreciation and remuneration) relating to reversible assets.

The above-mentioned ART resolutions also define (i) a safeguard mechanism aimed at ensuring that concessionaires recover capital costs relating to investments that have already been made or that are still to be made (if these have already been contracted / entrusted at the date of publication of the resolutions), in compliance with the level of profitability deriving from the application of the previous tariff system and (ii) the tariff principles and criteria relating to any continuation of operations beyond the expiry of the concession.

On 16 September 2021, a petition was filed with the Regional Administrative Court of Piemonte against Resolution n. 87/2021 issued by the Transport Regulatory Authority on 17 June 2021.

Traffic Figures for Light and Heavy Vehicles

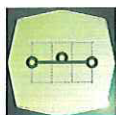

The following table is a summary of the traffic figures for light and heavy vehicles recorded for the Project in the Relevant Period compared to the PEF forecast set out in the Semi-Annual Financial Model.

Traffic Figures Actual Veh*km	Q1 2021	Q2 2021	First Half 2021 - Actual	First Half 2021 Forecast	Δ	Δ%
Light Vehicles	53,253,360	77,343,439	130,596,799	153,924,384	(23,327,585)	(15.2%)
Heavy Vehicles	34,150,927	39,144,975	73,295,902	65,308,767	7,987,135	12.2%

As a result of the gradual easing of the Covid-19 restrictions imposed by, *inter alia*, the Italian Government, traffic volumes on the motorway are gradually recovering. In particular, traffic figures for heavy vehicles seem to be returning to pre-pandemic levels.

The Project Revenues received in the Relevant Period amounted to Euro 43.4 million, in line with the PEF forecast set out in the Semi-Annual Financial Model.

Traffico e Sicurezza

In Breve

Il paragone tra i dati di viabilità autostradale dello scorso giugno con quelli registrati nell'analogo periodo del 2020 mostrano un evidente affievolimento (+23,8%) negli incrementi di traffico rispetto ai valori eccezionali che erano risultati nei paragoni relativi ai tre mesi precedenti. Ciò in quanto nel giugno 2020 erano ormai quasi del tutto terminate le limitazioni alla mobilità nazionale introdotte a causa della pandemia, e questo ha evidentemente influito sul confronto che potrà quindi a breve riprendere ad essere considerato idoneo per eventuali studi su serie storica tenendo pur tuttavia sempre presente un qualche perdurante divario rispetto ai "normali" tempi pre-

pandemia (il dato registrato nel 2019 era infatti superiore di oltre il 7%).

Dal punto di vista delle singole componenti veicolari, ovviamente la discrepanza più netta è stata ancora una volta riferita al comparto leggero, laddove il settore pesante – esente dalle limitazioni imposte alla circolazione nazionale – ha invece mantenuto un trend maggiormente regolare.

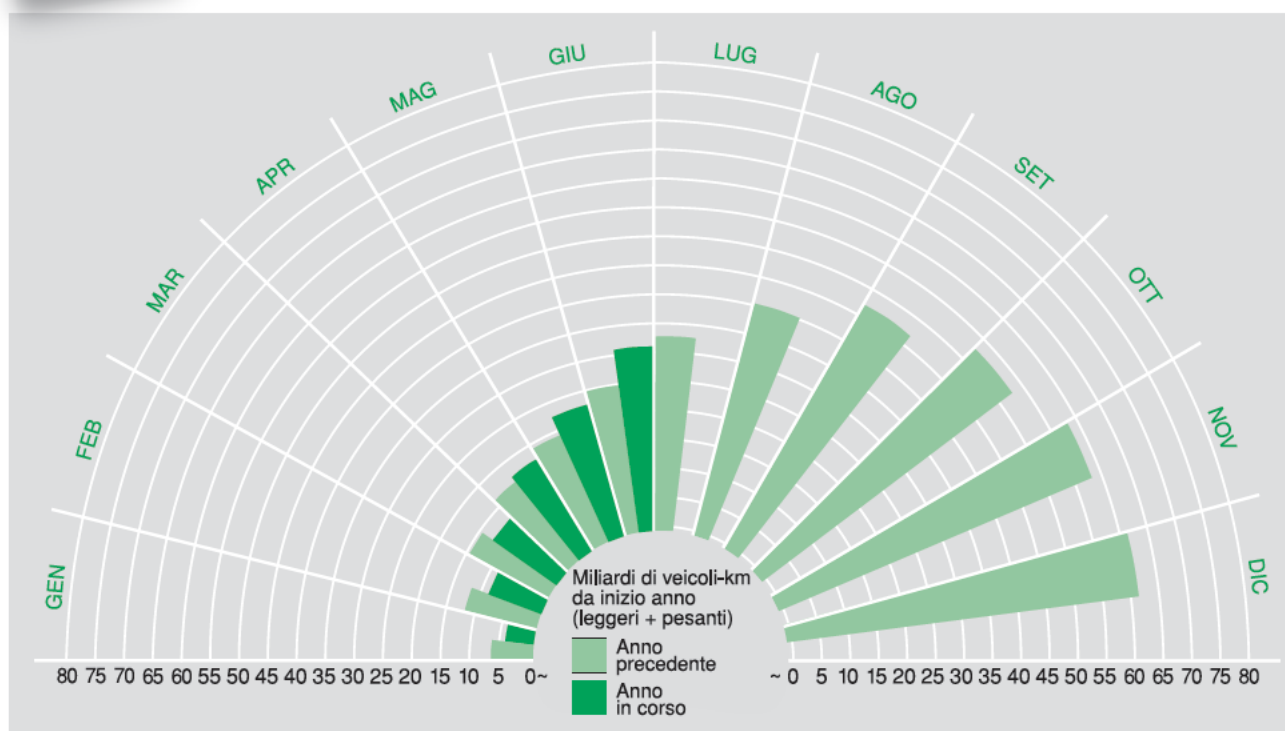

Passando ai numeri complessivi da inizio anno, oltre trenta miliardi e ottocento milioni di veicoli/km hanno percorso la rete autostradale a pedaggio in questa primo semestre, con un aumento di quasi il 25% rispetto al 2020 ma una diminuzione di circa il 23% se

guardiamo al 2019 prima dell'avvento del COVID.

Relativamente al settore della sicurezza stradale, infine, si nota un incremento generalizzato degli indici, che da un lato può considerarsi comunque una fisiologica oscillazione e dall'altro lato è sicuramente da attribuirsi in parte al superiore volume di traffico del mese corrente rispetto all'analogo del 2020.
