(2) Includes toll road Energy/Utilities, Insurance and other direct related costs

The decrease in “Fee and other costs” was mainly due to the decrease of the Concession Fee, which is calculated as 2.4% of net toll revenues. The decrease of Concession Fee is strictly related to the negative trend in traffic volumes in the First Half of 2020 due to the coronavirus (**Covid-19**) pandemic and associated restrictive measures imposed by, *inter alia*, the Italian Government.

(iii) Level of Tariffs

Below are the rates per vehicle class, net of VAT and ANAS surcharge, applied since 1 January 2020:

Toll Class	Tariff (€/km) since 1 january 2020
Light Cl. A	0.15266
Heavy Cl. B	0.18318
Heavy Cl. 3	0.21560
Heavy Cl. 4	0.35159
Heavy Cl. 5	0.42438

In the Relevant Period, no tariff changes have occurred and the Issuer has not requested any adjustment in tariffs.

Traffic performance in the Relevant Period was affected by the Covid-19 restrictions imposed by, *inter alia*, the Italian Government.

(v) Project Revenues

The Project Revenues actually received in the Relevant Period amounted to Euro 32.2 million compared to the Euro 58.9 million of the PEF forecast set out in the Semi-Annual Financial Model.

Toll road revenues	First Half 2020 - Actual	First Half 2020 - Forecast	Δ	Δ%

Total Project Revenues	32.226.805	58.983.144	(26.756.339)	(45,4%)
-------------------------------	-------------------	-------------------	---------------------	----------------

(*) Net of Anas surcharge (Euro 1.321k in the first half of 2020)

(**) Other revenues include service areas fee, third party services and toll-related items such as recovery of collection costs related to traffic volume arising from the A4 Interconnection, and recovery of costs previously advanced by us.

The decrease in Net Toll Revenues registered in the Relevant Period is closely related to the Covid-19 restrictions imposed by, *inter alia*, the Italian Government.

The insurance claim, disclosed in the Compliance Certificate delivered by the Issuer on 17 March 2020, relating to the meteorological event occurred on 7 August 7 2019 and that affected the Calcio tollbooth was settled. The indemnity paid to the Issuer under such claim was Euro 120,000 and fully covered the repair costs incurred by the Issuer.

No other material insurance claims have been made in the Relevant Period.

(vii) Description of Claims

- On 16 December 2019, the Issuer received a notice from the Grantor relating to (i) an alleged delay in completing the A35 motorway (the **Brebemi**) road works within the agreed timeline, and (ii) the

Società di Progetto Brebemi SpA

application of a penalty for such delay of Euro 1,000,000, to be applied in the context of the PEF Rebalancing, by deducting the relevant amount from the admitted costs (therefore without any immediate cash out for the Issuer).

On 31 January 2020, the Issuer submitted its response to the Grantor (i) setting out the reasons why the Issuer believed that the application of the penalty was unlawful, (ii) requesting the cancellation of such penalty by no later than 28 February 2020 and (iii) reserving its right to further challenge the imposed penalty.

However, on 27 February 2020, the Grantor confirmed the application of the penalty.

On 14 May 2020, the Company lodged an appeal with the Court of Milan pursuant to art. 702-bis of the Italian Civil Procedure Code (docket No.: 16239/2020) requesting the Court (i) to declare unlawful the penalty imposed by the Grantor and subordinately, (ii) to recognize the unlawfulness of the amount of the penalty imposed by the Grantor for manifest disproportion (taking into account the few works that were still to be completed as of 19 December 2015 and their merely ancillary relevance with respect to the main road works) and therefore requiring a reduction of the imposed penalty pursuant to article 1384 of the Italian Civil Code.

As of the date of this Periodic Investor Report, the Court of Milan has not yet set the next hearing.

- On 3 March 2020, Tubosider S.p.A (Tubosider) made an application requesting a payment injunction (decreto ingiuntivo) against the BBM Consortium and the Issuer arguing that despite having completed all the works related to the construction of the Brebemi toll-road which had been commissioned to it by the BBM Consortium, it had not yet obtained the release of the amounts withheld as guarantee by the BBM Consortium, due to the non-performance of the Brebemi's final testing. On 26 March 2020, the Court of Parma issued the injunction decree (decreto ingiuntivo) No. 588/2020, then notified to the Issuer on 12 June 2020, with which the BBM Consortium and the Issuer were ordered to pay Euro 1,645,641.35, plus interest and the costs of the procedure. On 22 July 2020, the Issuer served Tubosider a summons opposing the abovementioned injunction decree and requested that the BBM Consortium, which was ultimately the responsible party for the final testing of the works, be joined as a party to the proceedings. The next hearing before the Court of Parma has been set for 14 January 2021. As a result of the opposition filed by the Issuer, the injunction decree is currently not enforceable.

The Issuer believes that the risks of being exposed to material liabilities in connection with the above litigation is fairly remote and to have solid arguments to defend its position including, without limitation, because: (i) the Issuer is not part or otherwise involved in the contractual relationships between the BBM Consortium and its contractors (and the Issuer warned accordingly the BBM Consortium that it should

in no case be held liable for any matter stemming from such contractual relationships); (ii) the timing of the final testing of the works, to which the release of the amounts withheld as guarantee relates to, is decided upon by the competent Testing Committees (Commissioni di Collaudo) appointed by the Grantor and not by the Issuer; and (iii) the Issuer has already ordered the release, in advance with respect to the final testing of the works, of the amounts withheld as guarantee from the payments made to the BBM Consortium, against the presentation of retention bonds, as agreed in 2016.

In addition, it is worth noting that the matter is in the process of being resolved, as Testing Committees (Commissioni di Collaudo) No. 1 and No. 2 have already issued test certificates. Therefore, the Issuer will release shortly the corresponding guarantees of the BBM Consortium, which will in turn be able to proceed with the payment of the amounts due to Tubosider.

- There are no updates relating to the ANAC 2018 Resolution other than those previously disclosed in the Listing Particulars.
- There are no pending proceedings and no penalties have been imposed pursuant to the provisions of Legislative Decree 231.

- (1) For further details, please see Appendix 1 (*Financial Ratios Calculations*).
- (2) Until 31 December 2021. Waived in accordance with the Covenant Holiday STID Proposal (as defined below).

No Default or Financial Ratio Breach has occurred and is continuing as at the date of this Periodic Investor Report. We note that, following the STID proposal delivered by the Issuer on 30 June 2020 and approved by the requisite Secured Creditors on 22 July 2020 (the **Covenant Holiday STID** Proposal), the Default Ratios will not be tested for (12) twelve months, from and including the Interest Payment Date on 30 June 2020 to and including the Interest Payment Date falling on 30 June 2021.

Distribution Lock-Up has occurred as at the date of this Compliance Certificate. The Distribution Lock-up has been triggered by the lower economic and financial performance of the Issuer which are a direct result of the restrictions imposed in connection with the coronavirus (Covid-19) pandemic; these have significantly limited the specific actions the Issuer could implement to remedy to the situation. On the other hand, as presented by the Issuer during the Investor Meeting held on 15 May 2020 and set out in the Investor Meeting Presentation available on the Issuer's website, management have taken and is continuing to take several actions to cope generally with the Covid-19 outbreak

(xii) Material Operational Penalties

During the Relevant Period, no material operational penalties were claimed, pending or have been paid by the Issuer.

(xiii) Report by Associazione Italiana Società Concessionarie Autostrade e Trafori (The "Aiscat Report")

The most recent published AISCAT Report in relation to the Project can be found under Appendix 2 (*Aiscat Report*).

(xiv) Principal Amount Outstanding as at the End of the Relevant Period

The table below is a summary of the Principal Amount Outstanding of each of the Class A1 Notes, the Class A2 Notes, the Class A3 Notes, the Senior Secured Loan and the Junior Notes as at the end of the Relevant Period:

Account	Principal Amount Outstanding (in Euro) as of June 30, 2020
Class A1 Notes	14.943.197
Class A2 Notes	930.463.095
Class A3 Notes	557.965.333
Senior Secured Loan	304.451.900
Junior Notes	166.746.156

(xv) Interest Paid and Principals of the Junior Notes

For the period from (and including) the Issue Date to (and including) the last day of the Relevant Period, the Issuer paid Euro 7,671,141.36 of interest and repaid Euro 5,253,844 of principal amount in respect of the Junior Notes.

The principal amount repaid corresponds to the target balance set out in the Listing Particulars. As at 30 June 2020, the Principal Amount Outstanding of the Junior Notes amounted to Euro 166,746,156.

(xvi) PEF Rebalancing

No PEF Rebalancing occurred during the Relevant Period.

(xvii) Credit Rating

During the Relevant Period the following changes in the credit rating assigned to the Notes have occurred:

- On 26 March 2020, Fitch Ratings placed the Issuer's senior secured class A1, A2 and A3 notes on "*Rating Watch Negative*" and downgraded the Issuer's notes to 'BB+' from 'BBB-'. The rating action reflected Fitch Ratings expectation that the Issuer's Class A1 Notes and Class A2 Notes' credit profile and metrics would have been impacted by a severe-albeit potentially relatively short-lived -traffic decline related to Covid-19 pandemic, affecting ongoing traffic *ramp-up*. Fitch Ratings assume the 2020 shock to be progressively recovered by 2021 and the *ramp-up*.

Moreover, please note that on 12 August 2020 Fitch Ratings removed the Rating Watch Negative from the Issuer's Class A1 Notes, Class A2 Notes and Class A3 Notes and confirmed BB+ rating with Stable

Società di Progetto Brebemi SpA

Outlook. The removal of the Rating Watch Negative follows completed solicitation with Brebemi's senior creditors to grant a covenant holiday.

- On 18 June 2020, DBRS Ratings also placed the "BBB (Low)" Issuer Rating of the Issuer and the Issuer's Senior Secured Loan, Class A1 Notes, Class A2 Notes, and Class A3 Notes "*Under Review with Negative Implications*". The Issuer and the Notes' ratings have both been confirmed at "BBB (Low)". DBRS Ratings explained that the "*Under Review with Negative Implications*" status considers the significant headwinds and uncertainties that volume-based public-private partnership projects, such as toll roads, are generally facing as a result of the Covid-19 outbreak, and the potential for these conditions to specifically affect the Issuer's credit profile.

Traffico e Sicurezza

In Breve

Continua la lenta, ma costante, risalita dei volumi di traffico iniziata nel mese di maggio dopo il termine del periodo di lockdown nazionale, causato dall'emergenza legata al COVID-19, e la conseguente riapertura della circolazione. Le ripercussioni della crisi epidemiologica sui flussi autostradali – mai formalmente interrotti durante il lockdown ma sostanzialmente oggetto solo di spostamenti di emergenza e trasposto di merci di prima necessità – si fanno ovviamente ancora sentire in una certa misura, ma il processo di normalizzazione del traffico veicolare è sicuramente evidente: la perdita complessiva nel periodo in esame si è attestata sul 24,9%, contro il circa -55% che si era invece registrato a maggio e l'oltre -80% di aprile (ultimo mese di lockdown). Questo risultato è dato dalla

combinazione di un deciso incremento del traffico leggero rispetto ai mesi precedenti (-28,2%) affiancato da un comparto pesante altrettanto positivo che ha raggiunto un -13,6% (sebbene sia da ricordare come tale dato è conseguenza anche del minore impatto subito dal settore dell'autotrasporto, che come sopra detto ha sempre continuato a circolare – seppur in misura ridotta – per garantire la consegna delle merci). Globalmente, quasi 25 miliardi di veicoli/km hanno transitato sulle autostrade a pedaggio in questo primo semestre, laddove nell'analogo arco temporale del 2019 avevano superato i 40 miliardi con uno scarto in negativo pari al 37,6%.

Per quanto concerne l'analisi dei dati sulla sicurezza, bisogna notare come essi si

siano mantenuti a livelli più che favorevoli nonostante l'evidente risalita (seppur non ancora completa) dei volumi di traffico, dando degli ottimi ritorni sia in termini di tasso di incidentalità (-25,3%) sia in termini di tasso inerente alle persone rimaste ferite negli eventi (-33%). Spostando invece l'attenzione sul dato riguardante la mortalità, il segno positivo dell'apposito indicatore deve essere letto alla luce della relativa esiguità dei valori in questione, nonché del fatto che esso è calcolato tenendo in considerazione i decessi avvenuti in rapporto ai minori chilometri percorsi sulla rete rispetto al periodo di paragone; così che anche a fronte di una diminuzione del numero di vittime (quattro in meno di quante riportate nel giugno 2019) è possibile assistere ad un tasso percentuale leggermente sfavorevole.
